Forecast for Friday 17 Dec 2021

Weather: Patchy fog and low cloud at first, mainly across coastal ranges. This will soon clear to leave long periods of unbroken sunshine. Clear skies in the evening with a touch of frost and a few fog patches developing in the glens.

Chance of cloud free mountain/hill tops above 800m: 40% at first, otherwise 95%.

Visibility: Mainly excellent views. A few fog patches in the glens with patchy cloud and fog above 400m at first but this soon clearing.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View

High pressure will introduce sunny or clear conditions. A strong temperature inversion due to subsiding air under the high will mean the summit temperatures may become warmer than in the glens, reaching 10 to 13 Celsius on the tops during the afternoon.

Forecast for Saturday 18 Dec 2021

Weather: Clear skies overnight with patchy fog and frost down in the glens. Saturday will be dry and sunny but some low cloud may spread into west coast in the evening.

Maximum wind: West or Southwest 5 to 10mph.

Chance of cloud free mountain/hill tops above 800m: 100%.

Visibility: Mostly excellent. Isolated fog patches in the glens in the morning. Areas of cloud may affect low to mid slopes of coastal ranges later.

Temperature: **Glens:** 0 to 2 Celsius, rising to 6 or 7 Celsius.
At 800m: Plus 5 Celsius rising to 10 to 13 Celsius, falling back to 6 or 7 Celsius after dark.
Freezing level: Above summits. Early frost in glens.
